Dear Rich,

Glad to get your email.

Our alpha GPC is chemical synthesis, not from soy or sunflower lecithin. But it is still used a lot as drug or food supplements in many countries.

I hope it also works for you.

Best Regards,

Trina Tang

Subject: Alpha GPC Inquiry

Good day,

Could you tell me if your alpha gpc is derived from soy or sunflower lecithin? If not what is the original source material?

Thank you,

Rich F.
